***Please use blue or black ink to complete form.***

The physicians of Peachtree City Obstetrics and Gynecology, P.C. believe that an annual gyn exam (also called “wellness visit,” “routine visit” or “exam and pap”) is important to the health and well-being of our patients. We encourage all females to schedule a yearly checkup.

Federal guidelines mandate our use of a certain range of “procedure codes” to describe the office visit portion of a wellness/preventive medicine visit, as named above. The codes describe the patient’s “new” (not seen in 3 years) or “established” status, and her age group: 12-17, 18-39, 40-64 and 65 and over. The codes range from 99384-99397.

Over half of all insurances do not pay for preventive medicine visits. In signing the waiver below, you agree to be fully responsible for payment for your services here, if such services are not covered by your insurance. (Any questions related to your coverage limitations should be directed to either your employer or your insurance company.)

I have read and understand the statement above, and agree to its terms.
